No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (27 Congress Street, Salem, Massachusetts 01970), for copying beyond that permitted by Sections 107 or 108 of the U. S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1985 articles are as shown on the article title pages; if no fee code appears on the title page, the copy fee is the same as for current articles.

AUTHOR INDEX FOR VOLUME 9 469

Journal of Comparative Economics
Information for Authors

The *Journal of Comparative Economics* will publish theoretical and empirical articles on the comparison of economic systems and subsystems, both contemporary and historical. Manuscripts should be submitted in triplicate to Professor J. C. Brada, Editor, *Journal of Comparative Economics*, Department of Economics, Arizona State University, Tempe, Arizona 85287, U. S. A.

Manuscripts are accepted for review with the understanding that the same work will not be nor is presently submitted elsewhere; that its submission for publication has been approved by all of the authors; and that any person cited as a source of personal communications has approved such citation.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

Any statements in the article once it is accepted by the Editor remain the sole responsibility of the author(s), including personal communications from other scholars. They represent only the opinions of the author(s) and should not be construed to reflect the opinions of the Editors, the Association, or the Publisher.

Manuscripts should be prepared according to the style rules outlined below. Deviation from these rules may cause publication delays.

Form of Manuscript. Submit manuscripts in English in triplicate, typed double-spaced on one side of 8½ × 11-inch white paper. All pages should be numbered. *Page 1* should contain the article's title, author(s) name(s) and affiliation(s) (name of institution, city, state and zip code); the complete mailing address of the author to whom proofs should be sent; and a suggested running head (abbreviated form of the title) of less than 35 characters. *Page 1a* should contain a short abstract of approximately 100 words for use in the *Journal of Economic Literature.*

List of Symbols. A complete list of symbols used in the manuscript must be included. All symbols should be identified typographically, not mathematically. This list will not appear in print, but it is essential to avoid costly author's corrections in proof. Distinguish between "oh" and "zero"; "ell" and "one"; "kappa" and "kay"; etc. All letters used as symbols will be set in italics unless a special type (e.g., Greek, boldface, script) is specified. Note that *if the equations are handwritten in the text, then the list of symbols should also be handwritten.*

Equations. All displayed equations should conform to the author's list of symbols and be typewritten, if possible, or neatly handwritten. All equations to which reference is made in the text should be numbered consecutively, with optional subdivision by sections; equation numbers should be placed in parentheses against the right margin.

Footnotes. Number footnotes consecutively, with superscript Arabic numerals, beginning with the article title. They should be typed double-spaced on a separate page.

Tables. Number all tables consecutively with Arabic numerals. Each table should be typed double-spaced on a separate page. All tables should have titles. If footnotes to the table are necessary they should be indicated by superscript italic letters, *a*, *b*, *c*, and should be typed immediately below the table. Indicate in the margins where you would prefer to have the table inserted.

Figures. All illustrations are to be considered as figures and should be provided as camera-ready copy. Number the figures consecutively; type their legends double-spaced on a separate

page, not on the figures themselves. Plan figures to fit the proportions of the printed page (approximately 5 × 7- or 8 × 10-inch originals). Figures should be professionally drawn and lettering should be planned so that it will be legible after a reduction of 50 to 60%. Indicate in the margins where you would prefer to have the figures inserted.

References. All references should be cited in the text by the author's surname and date of publication, e.g., Smith and Jones (1984) or (Smith, 1984) and typed double-spaced. All references should be listed at the end of the article in alphabetical order by authors' surnames. Abbreviations of journal titles should conform to general usage in economics. The following reference styles should be used in the reference list.

Desai, Padma, ed., *Marxism, Central Planning, and the Soviet Economy.* Cambridge, Mass.: MIT Press, 1983.

Ericson, Paul G., and Miller, Ronald S., "Soviet Foreign Economic Behavior: A Balance of Payments Perspective." In *Soviet Economy in a Time of Change,* Vol. 2, pp. 208–244. Comp. of Papers, Joint Econ. Comm., U. S. Congress. Washington, D. C.: U. S. Govt. Printing Office, 1979.

Furubotn, Eirik G., and Pejovich, Svetozar, "Property Rights and Economic Theory: Survey of Recent Literature." *J. Econ. Lit.* **10,** 4:1137–1162, Dec. 1972.

Swain, Nigel, "The Evolution of Hungary's Agricultural System since 1967." In Paul Hare, H. Radice, and N. Swain, eds., *Hungary: A Decade of Economic Reform,* pp. 225–251. London: Allen & Unwin, 1981.

Proofs. Proofs will be sent to the Author. Authors are responsible for correcting the proofs of their article. *The proofs should be returned to the Editor.* Authors will be charged for changes (other than corrections of printing errors) in excess of 10% of the cost of composition.

Reprints. Reprint order forms will accompany the proofs. Fifty reprints without covers will be provided free of charge. Additional reprints may be purchased from the Publisher.
